

Manual for double bit security lock

!!ATTENTION: Please read this operating instructions carefully, before you operate the lock. We can not take any liability for functional disorder because of faulty switch over or use of violence or improper use and neither for damage nor for loss of property which could be put down i.e. to the not proper closing of the safe.

Opening the vault

Opening of a lock WITH doorhandle:

- Insert the key, with the tallest bit of the key pointing in the direction of the doorhandle.
- Turn the key clockwise, until you can turn no further.
- Turn the doorhandle clockwise, until you can turn no further.
- Pull the handle to open the door.

Opening of a lock WITHOUT doorhandle:

- Insert the key, with the tallest bit of the key pointing to the left.
- Turn the key clockwise, until you can turn no further
- Open the door.

Closing the vault

Closing WITH doorhandle:

- Close the door.
- Turn the doorhandle anti-clockwise, until you can turn no further.
- Turn the key anti-clockwise, until you can turn no further.
- Take out the key. The vault is closed.

Closing WITHOUT doorhandle:

- Close the door.
- Turn the key anti-clockwise, until you can turn no further.
- Take out the key. The vault is closed.

ATTENTION:

Make sure, that before you close the door, the pin locks are not visible. If you try to close the door with the pin locks sticking out, you can both damage the vault and the lock. You can only take out the key, when the door is properly locked.

ATTENTION:

- The double bit security lock always comes with 2 keys. Ordering extra keys is possible, but only when an original key is presented (ask your supplier). Because of security reasons it is not possible to send duplicate keys on the basis of serial and/or type numbers.
- In case both keys are lost and/or not functioning properly, the lock will have to be replaced.
- Protect your key. Make sure it doesn't get damaged and/or dirty.
- Do not use any substance to oil your lock..
